

How to lookup High Speed CV Kits by Application

- 1 Locate Manufacture
- 2 Locate Model & Year of vehicle
- 3 Check driveshaft type by referring to (Ill.) column. Letters in (Ill.) column refer to driveline configurations at the bottom of each page.
- 4 Check the location of the High Speed CV kit on the driveshaft by referring to the (Location) column.
- 5 Locate the part number in the column to the right of the appropriate (Location) - Footnotes are also added for additional identification where needed.

How to lookup High Speed CV Kits by Size

- Using our CV JOINTS / SPLINED STUBS / BOOT KITS / CRIMPING FIXTURES catalog you can see a photo of the cv joint to match up with your original part on pages 4 to 13.
- Pages 14-15 of this catalog offer dimensions that will aid you in positive identification of all of the High Speed CV Joints offered by Rockford Driveline.
- Note: Dissassembly will aid in identifying part as you may need to count teeth of the inner race or shafts.
